

Photo to Movie

Add Motion to Your Slide Shows

Forget the Static Slide Show...
**Make a Movie with
Your Digital Photos!**

Photo to Movie™ turns digital photos into customized QuickTime™ movies. Drop in a soundtrack with music or voice over, add titles, create motion and choose from a variety of slide transitions. Edit your movie further using iMovie® or Final Cut®, then burn your final masterpiece to DVD - or export to QuickTime and post on your webpage or email to family and friends.

Easy to use

- Drag and drop photos into application.
- Zoom, pan, and rotate to create motion.
- Choose from many preset motions.
- Use transitions between photos.
- Add and edit music and audio.
- Preview movie and sound using timeline.
- Create and place multiple titles.
- Export to any QuickTime format.

Photos

- Compatible with most photo formats including JPEG and TIFF.
- Use curved, multi-segment motions.
- Cut and paste to rearrange photos. Titles, Audio, and Transitions
- Position titles and timing by dragging.
- Choose font, style, and size of titles.
- Drop shadows on titles (10.3 or later).
- Record audio using microphone.
- Adjust in/out and fade in/out of audio.
- Use various transitions between photos.

Export

- Export to widescreen or standard.
- Export to DV (NTSC or PAL) or any QuickTime file format.

Awards & Praise

"Photo to Movie is positively addicting... This is powerful software for the creative video amateur or professional."
Tim Johnson, Feature Animation Director

"Photo to Movie does a fantastic job. Moviemakers who have stepped beyond iMovie but don't yet earn a living in video will love it. Rated GREAT!"
MacAddict

"PTM's user interface is quite elegant and the learning curve is negligible. I found myself creating high-quality QuickTime movies with smooth transitional effects, after only seven or eight minutes.... I can think of no better tool at this price point (\$49) than Photo to Movie."
Hubblemac.com

"It is rare to find an application that does what it should in such a simple and straightforward way."
O'Reilly MacDevCenter
